51206 7590 03/24/2010 TOWNSEND AND TOWNSEND AND CREW LLP/ORACLE TWO EMBARCADERO CENTER 8TH FLOOR SAN FRANCISCO, CA 94111-3834			EXAMINER ANDERSON, JOHN A	
			ART UNIT 3694	PAPER NUMBER
			MAIL DATE 03/24/2010	DELIVERY MODE PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/691,941	Applicant(s) SOLBERG ET AL.	
	Examiner JOHN A. ANDERSON	Art Unit 3694	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 March 2010.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-7, 12, 13, 15-17, 44-52 and 54-56 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-7, 12, 13, 15-17, 44-52 and 54-56 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

1. In the amendment filed 11/03/2009, claims 1-3,12-13,15-17,44-46,51-52 are pending and are presented for examination.

Information Disclosure Statement

2. The information disclosure statement dated 05/26/2009 and 09/25/2009 have been considered.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject

Art Unit: 3694

matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1,148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:
 1. Determining the scope and contents of the prior art.
 2. Ascertaining the differences between the prior art and the claims at issue.
 3. Resolving the level of ordinary skill in the pertinent art.
 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
5. Claim 1-3, 12-13, 15-17, 44-46, 51-52 are rejected under 35 U.S.C. 103(a) as being unpatentable over Koppelman et al (Patent 6,662,164) and in view of Pressmar P (PGPub 2003/0004960).
6. As regards to claims 1, 12, 44 and 51, Koppelman discloses a transaction filtering system for allocating transactions among a plurality of business objects, the system comprising:

storage configured to store generated allocation rules and to store transaction

data associated with a plurality of transactions, each generated allocation rule being associated with at least one of the plurality of business objects, each generated allocation rule being generated by combining a first predefined rule of a node of a hierarchical data structure with a second predefined rule inherited from a parent node, the first predefined rule characterizing a member of the at least one of the plurality of business objects; [column 10, lines 23-36]

Koppelman does not disclose a query engine configured to query the transaction data using the generated allocation rules; and an allocation manager configured to make one or more attempts to allocate a member of the plurality of transactions among the plurality of business objects, wherein each generated allocation rule determines if a business object is entitled to an allocation from a particular transaction.

Pressmar discloses a query engine configured to query the transaction data using the generated allocation rules; and [99,105,112] an allocation manager configured to make one or more attempts to allocate a member of the plurality of transactions among the plurality of business objects, [0012,0103] wherein each generated allocation rule determines if a business object is entitled to an allocation from a particular transaction.

It would have been obvious for a person of ordinary skill in the art at the time of the invention was made to use Pressmar in the device of Koppelman. The motivation would have been to dispatch members as required among the business units.

7. As regards to claims 2, 45 and 52, koppelman discloses The transaction filtering system of claim 1, wherein a member of the plurality of transactions is a sale and the query engine is configured to determine commission allocation.[column 2 lines 50-52]
8. As regards to claims 3 and 46, koppelman discloses The transaction filtering system of claim 1, wherein a member of the plurality of transactions is a purchase and the query engine is configured to determine cost allocation.
9. As regards to claim 13 Koppelman discloses the computing system of claim 12, wherein the hierarchical data structure is configured to represent relationships between business objects in a sales organization. [column 6 lines 7-16, lines 35-46]
10. As regards to claim 15, koppelman the computing system of claim 12, wherein the first generated allocation rule is produced by traversing the hierarchical data structure..[column 10 lines 23-26]
11. As regards to claim 16, koppelman discloses the computing system of claim 12, wherein the second query is configured to identify a business object having a management role with respect to a node of the hierarchical data structure.

[column 1 lines 39-43]

12. As regards to claim 17, koppelman discloses the computing system of claim 12, further including a transaction source configured to generate the transaction data..[column 10 lines 23-26]
13. Claims 4-7,47-50,54-56 are rejected under 35 U.S.C. 103(a) as being unpatentable over koppelman et al (Patent 6,662,164) and in view of Pressmar P (PGPub 2003/0004960) and in further view of Finebaum M.L. (PGPub 2002/0156719)
14. As regards claims 4-6,54-56 and 47-49 Koppelman does not disclose The transaction filtering system of claim 1, wherein a member of the plurality of transactions is unallocated after a first attempt at allocation.
wherein a member of the plurality of transactions is under-allocated after a first attempt at allocation.
wherein a member of the plurality of transactions is over-allocated after a first attempt at allocation.
Finebaum discloses The transaction filtering system of claim 1, wherein a member of the plurality of transactions is unallocated after a first attempt at

allocation.

wherein a member of the plurality of transactions is under-allocated after a first attempt at allocation.

wherein a member

of the plurality of transactions is over-allocated after a first attempt at allocation.

[0275]

It would have been obvious for a person of ordinary skill in the art at the time of the invention was made to use Finebaum in the device of Koppelman. The motivation would have been to allocate partial trades throughout the day.

15. As regards claims 7 and 50, Koppelman does not disclose The transaction filtering system of claim 1, wherein a second attempt at allocating the member of the plurality of transactions includes identifying a business object configured to manually determine the allocation.

Finebaum discloses wherein a second attempt at allocating the member of the plurality of transactions includes identifying a business object configured to manually determine the allocation.[0373]

It would have been obvious for a person of ordinary skill in the art at the time of the invention was made to use Finebaum in the device of Koppelman. The motivation would have been to allocate transactions manually or automatically.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JOHN A. ANDERSON whose telephone number is (571)270-3327. The examiner can normally be reached on Monday through Friday 8:00 to 5:00 Pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571-272-6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
